

# Shadman Muhtasim Ariq

746 Swanston St, Carlton VIC 3053

+61 490325810 | 5002.ariq@gmail.com | LinkedIn | Github

Self-taught developer who picked up Python, C++, Java, and JavaScript on my own, then moved into React and full-stack web development. I recently taught myself TypeScript in a single hackathon night to keep up with a new team's stack, and I'm currently building an iOS app with Swift and Supabase, a language and framework I learned from scratch for the project. I'd rather learn a new tool mid-project than sit one out, and building things - fast, and often outside my comfort zone - is what keeps me in this field.

## WORK EXPERIENCE

### USG (under Secretary General), Hospitality

Dhaka, Bangladesh

#### SFX Greenherald Internation School

Jun 2025 - Jul 2025

- Manage guests and attendees with a team
- Cultivated a supportive team environment by proactively addressing team members' needs and providing timely recognition, resulting in enhanced team morale and positive guest experiences.

### Intern, Graphical Design

Dhaka, Bangladesh

#### Holycity Developments Limited

Jun 2024 - Aug 2024

- Created their physical portoflio showing the history of the company and all of their projects.

## SKILLS

**FULLSTACK:** Next.js, ReactVite, Typescript, Javascript, FastAPI, Supabase, Python, HTML, CSS, pnpm, C++

**PROGRAMMING:** Python, C++, Java

## PROJECTS

### EaMoSleMo

Apr 2026 - Present

A wellness helper app that tracks your sleep, exercise, and nutrition, then recommends a full weekly meal plan that fits your goals and your grocery budget. Built with a team of strangers I met on the first day of the hackathon.

### Racle

Aug 2026 - Aug 2026

A gamified AI receipt scanner that tracks food carbon footprints and maps nearby scrap vendors for instant recycling cash payouts.

### PEDDY

Dec 2025 - Dec 2025

Peddy is a responsive pet adoption platform developed for a Programming Hero assignment. Built with HTML, CSS (Tailwind & DaisyUI), and JavaScript, it allows users to browse pets by category, view details, and adopt. Integrates with Programming Hero's APIs for dynamic data across devices.

## EDUCATION

### Monash University

*Bachelor of Computer Science Specialization in Algorithms and Software - Specialization in Cybersecurity*

Jan 2026 - Present

- Projects Team member, MNET (Monash Nexus Emerging Tech)
- Social Media Manager, gdgmonash (Google Developer's Club Monash)
- Hackathon Finalist, MelbourneHack (Hosted by University of Melbourne)

### SFX Greenherald International School

*A levels (Advanced Level) - Computer Science, Physics, Maths*

Jan 2023 - Jan 2025

- Public Relations Officer, Robotics Club
- Head of Hospitality for Events team

## ACADEMIA

*O levels (Ordinary Level) - Computer Science, Physics, Chemistry, Additional Mathematics, Maths Syllabus D, Bangla, English*

Jun 2014 - Jun 2023

## CERTIFICATIONS

**Certificate for Honor's** | SFX Greenherald Internation School

Jan 2025

Given to students who received straight A's in their Advanced Level Examination.
